

FUGITIVE EMISSION MANAGEMENT SYSTEM

DESCRIPTION

CAPP's *Best Management Practice for Fugitive Emissions Management* outlines the requirements for companies to manage their FEMS by December 31, 2009.

AER *Directive 060* states that operators must meet or exceed the CAPP Best Management Practice for Fugitive Emissions.

Eclipse Compliance (Eclipse) will implement a comprehensive management program to ensure complete compliance to the requirements for Fugitive Emissions by using a 7 step process.

Using the Eclipse solution to manage your Fugitive Emissions will ensure compliance for you today and in the future.

PROGRAM DELIVERABLES

- Identify all target components that are required to be tested
- Provide leak detection with quantified results.
- Provide analysis for repair protocols
- Continue to monitor existing leaks until they are repaired
